PROFESSIONAL SUMMARY

Supplier Quality Engineer with experience in the automotive and aerospace-adjacent component manufacturing industry. Experienced in FMEA, Control Plans, PPAP submissions, 8D problem solving, CAPA, and SPC. IATF 16949 awareness trained. Strong communicator with ability to interface with suppliers and customers simultaneously.

SKILLS

- Supplier Quality Engineering
- PPAP (Production Part Approval Process) – Levels 1 to 3
- Failure Mode and Effects Analysis (FMEA)
- Control Plans
- APQP – Basic Awareness
- SPC (Cp, Cpk, Control Charts)
- 8D / G8D Problem Solving
- CAPA
- Measurement System Analysis (MSA) – Gauge R&R Studies
- IATF 16949:2016 Awareness
- Drawing Reading, GD&T
- CMM Reporting (Romer Arm – assisted)
- MS Excel, PowerPoint
- Teamcenter PLM – Basic

WORK EXPERIENCE Supplier Quality Engineer Robert Bosch Engineering and Business Solutions Pvt. Ltd, Bangalore 09/2021 – Present (3 years)

- Manage PPAP submissions for 25 new supplier components per year; ensure completeness before SOP
- Review supplier FMEAs and Control Plans; provide structured feedback for improvement
- Conduct on-site supplier audits at 15+ vendors; identify and close quality gaps
- Lead 8D investigations for field returns linked to supplier components; coordinate root cause validation
- Maintain SPC data for critical incoming components; monitor Cpk trends monthly
- Support APQP activities during new platform launches — track timing, open issues
- Conduct Gauge R&R studies with suppliers; reject measurement systems with GRR > 30%
- Reduced supplier-linked field complaints by 28% in 24 months

EDUCATION B.Tech – Mechanical Engineering BMS College of Engineering, Bangalore VTU |
Graduated: 07/2021 CGPA: 8.0 / 10

CERTIFICATIONS

- IATF 16949:2016 Awareness Training – Bureau Veritas (2022)
- Internal Auditor ISO 9001:2015 – SGS India (2023)

PROJECTS / ACHIEVEMENTS

- Reduced supplier-linked warranty PPM by 28% over 24 months
- Established PPAP tracking dashboard in SharePoint — adopted by team of 8 SQEs
- Identified systemic dimensional non-conformance in brake pad supplier; initiated corrective action that prevented potential recall of 4000 units
